Overlay MatchTimer — Tuesday manual test (~15 min)

Build: v1.7.0 · **PC:** work machine · **Date:** _____ · **Tester:** _____

Install from the zip (`OverlayMatchTimer-v1.7.0.zip` → `Overlay-chrome-extension/`). Load unpacked in `chrome://extensions` (Developer mode). Do not use an old folder.

Mark each row: `[ ]` → `[x]` when pass. Use **Notes** for anything odd (screenshot path / console error).

0. Install & shell

#	Action	Expected	✓	Notes
0.1	Load unpacked from zip's `Overlay-chrome-extension`	Extension shows **1.7.0**, no errors on card	[ ]	
0.2	Check toolbar / extensions icon	Slash + **20:08** badge top-left (v2) on dark tile	[ ]	
0.3	Open popup	Header: SP logo with **20:08** badge over the mark (same offset as icon-128) + OverlayMatchTimer; footer `v1.7.0`	[ ]	

1. InplayIP

Open a live/VOD InplayIP match page with the overlay injected.

#	Action	Expected	✓	Notes
1.1	Confirm HUD	Clock + control panel appear over video	[ ]	
1.2	Click clock → type `45` → Enter	Clock shows **45:00** (or running from that point)	[ ]	
1.3	Edit: `45.30`	Accepts → **45:30**	[ ]	
1.4	Edit: `45,30`	Accepts → **45:30**	[ ]	
1.5	Edit: `45 30`	Accepts → **45:30**	[ ]	
1.6	Edit: `45:70`	Stays open; **thin red outline**; hint **Seconds 0–59**; no commit	[ ]	
1.7	Press **Esc** while editing	Edit cancels; previous valid time restored	[ ]	
1.8	Popup → Customize → move clock through 6 positions × sizes S–XL × Box/Pill/Minimal	Clock stays clear of OSD/timeline; style matches choice	[ ]	
1.9	Speed row / panel hide / autohide	Behave as usual; no layout break	[ ]	
1.10	Trigger an OSD (skip / play)	OSD appears **at top**, not over clock oddly	[ ]	

2. Examino (DVR / VOD)

#	Action	Expected	✓	Notes
2.1	Open Examino DVR or VOD play URL	Overlay injects; clock + panel work	[ ]	
2.2	Repeat clock edit smoke (`45`, `45.30`, invalid `45:70`, Esc)	Same as InplayIP	[ ]	
2.3	Kick-off / sync controls you normally use	Still set clock vs video as before	[ ]	

3. Local player

#	Action	Expected	✓	Notes
3.1	Popup → **Open local player**	New window; same HUD chrome	[ ]	
3.2	Open a local / NAS-mapped file	Playback + clock + shortcuts work	[ ]	
3.3	Enable ShuttleXpress only on this window if testing device	Toggle stays per-window	[ ]	

4. Customize — shortcuts

#	Action	Expected	✓	Notes
4.1	Rebind Play/Pause to another key	Binding updates; works on page	[ ]	
4.2	Bind two actions to the same key	Inline **conflict** warning	[ ]	
4.3	Use a native-ish shortcut (e.g. space) while focused on page	Extension override still fires when expected	[ ]	
4.4	**Reset all shortcuts**	Defaults restored	[ ]	

5. ShuttleXpress (device + Customize)

#	Action	Expected	✓	Notes
5.1	Enable Shuttle on page; pair device	Connects; cheatsheet/controls as usual	[ ]	
5.2	Press Btn 1–5, turn Jog, rock Shuttle ring	Correct skip / play-pause / frame / scrub; **OSD** labels unchanged	[ ]	
5.3	Customize: click **Btn 5** on SVG	**Only** Btn 5 orange on diagram **and** its row; Jog/ring neutral	[ ]	
5.4	Focus **Jog** select	**Only** Jog highlighted on SVG + row	[ ]	
5.5	Move Play/Pause to **Btn 5**	Btn 5 = Play/Pause (no number field); Btn 3 = **+2m**; General diagram labels match	[ ]	
5.6	Press physical Btn 5 / Btn 3	5 toggles play; 3 skips +2m; OSD correct	[ ]	
5.7	**Reset all ShuttleXpress**	Btn 3 Play/Pause; 1 –2m; 2 –10s; 4 +10s; 5 +2m	[ ]	
5.8	Auto pause on Alt+Tab **ON**, Shuttle **enabled** on page	Alt+Tab does **not** pause (Shuttle skip path)	[ ]	
5.9	Shuttle **off**, Auto pause **ON**	Alt+Tab pauses; return resumes only if we paused it	[ ]	

6. General tab & reset

#	Action	Expected	✓	Notes
6.1	Default General	Actions open; Shortcuts + Shuttle **collapsed**	[ ]	
6.2	Open ShuttleXpress	**Diagram only** (live labels); no Btn 1…5 text list	[ ]	
6.3	**Reset all customizations**	Clock, shortcuts, Shuttle, kickoff sync back to defaults (sync **off**)	[ ]	

7. Kickoff sync (optional, default off)

Skip unless testing team sync. Do **not** use a production Supabase project with real keys in a shared zip.

#	Action	Expected	✓	Notes
7.1	Customize → Kickoff sync section	**Collapsed** by default; toggle **off**	[ ]	
7.2	Leave sync off; use Kick-off / nudge on a match	No sync network traffic; clock works as before	[ ]	
7.3	Enter test project URL + anon key; turn sync **On**	Chrome asks for host permission; status says sync on	[ ]	
7.4	Set Kick-off on machine A; open same match (or same Room id) on B with sync on	B picks up kickoff within a few seconds	[ ]	
7.5	Turn sync **Off**	Status / behaviour: no further sync requests	[ ]
